Ludwig Kohlhammer

Manager of the Schenker's Company. Kohlhammer's file at the Third group of the secret police which controls the activities of all foreigners in Roumania bears No. 27675 and is about his activities from 1938 in Roumania.

From his membership card we can see that K. had a recommendation from Berlin, to be used in German service for economical espionage in Roumania. Because his activity in this sphere was very valued by his superiors, they gave him the control of all permanent and transitory Germans who came to Roumania for economical interests. From the inquiries of the secret police, we can see that K. made enough relations with the Roumanian economical and financial circles to get information about all questions which could be of interest to him. His collaborator is Mr. Walter Roth.

The whole activity of K. was and is watched, especially the years 1938-1942, and is contained in the file. It seems that beside the economical espionage, K. was not interested in political and military espionage.

At Police Headquarters (not secret police) there is no file for K.

P.S. From the informations of the file, we can see that K had something to do with the recalling of the German Ambassador Fabritius, because Berlin took into consideration also the informations given by K. about Fabritius.
